Subject: RE: Canadian Radium and Uranium Site

A morning meeting would be ideal, but we can be flexible. Many thanks, Nick.

Margo B. Ludmer
Assistant Regional Counsel
New York/Caribbean Superfund Branch
Office of Regional Counsel
U.S. Environmental Protection Agency, Region 2
(212) 637-3187

> Margo, the property, Tenant and property owner are all in Mt. Kisco. To have a meaningful meeting, the meeting must be at the site so the property owner and contractor can discuss and observe the site. While the contractor may be generally familiar with the area, it is not familiar with the specific property.
>
> So, I suggest the contractor meet with our client in person and we can arrange for you and anyone else who does not wish to travel to meet with our client in person, to participate on the phone. As the contractor is the one performing the work and our client has significant concerns about the performance of the site work interrupting the Tenant's business, we believe the EPA should have the contractor meet in Mt. Kisco, in person.

We believe it would be productive to meet in our office with you and EPA's contractor to further discuss our client's concerns and see if a mutually agreeable understanding can be reached. Please advise of some dates that you and the contractor are available to meet with us and our clients. Thank you.

> EPA can accommodate conditions 3, 4, and 5 of your August 29 letter. With respect to 1(a), EPA can provide the dates and times of access in advance, but will not limit performance of the work to dates/times when the Tesla facility is closed. With respect to 1(d), EPA has already provided a detailed overview of the work to be performed, including a draft QAPP. EPA will not agree to conditions 1(b), 1(c), 1(e), 1(f), 1(g), and 2. EPA does not anticipate that the work will take more than four days to complete, but unforeseen circumstances, such as a storm event, may prolong the sampling another day or so.

>> On Aug 30, 2018, at 10:22 AM, Ludmer, Margo <ludmer.margo@epa.gov> wrote:
>>
>> Nick,
>>
>> EPA is in receipt of your letter dated August 29, 2018, regarding the Canadian Radium and Uranium Site. Over the past several months, EPA has had numerous discussions with you and your colleague, Joel Sachs, regarding the scope of EPA's planned sampling at your client's Kisco Avenue property. EPA provided you with a draft QAPP and explained in detail the work to be performed. We also reviewed many of the points raised in your August 29 letter to us.
>>
>> As discussed, we can meet several of the conditions itemized in your letter (e.g., EPA can provide the specific dates and times of access, provide a description of the work to be undertaken, and provide advance notice of entry). However, as has been made clear, many of the conditions in your letter are unacceptable to EPA, including that EPA indemnify your client for any loss of income or termination of leasehold interest, that EPA perform the work outside of the Tesla facility's hours of operation (Monday to Saturday, 10 a.m. to 7 p.m., and Sunday, 11:00 a.m. to 6:00 p.m.), and that EPA delay soil sampling until after air sampling and gamma surveying has been performed and the results of that work have been analyzed.
>>
>> In accordance with EPA guidance, conditions that restrict or impede the manner or extent of EPA response work, or that precondition access on indemnity or compensatory obligations, are to be treated as denial of consent to EPA access. Your August 29 letter indicates that all conditions listed in that letter must be included in any access document signed by your client. Please confirm that your client is firm in his denial of access subject to the preconditions unacceptable to EPA, as set forth in this correspondence. If so, please be advised that EPA will be forced to consider its enforcement options with respect to its investigation of your client's property.
